

Fireproofed Organic Absorbent (Industrial and Road Mineral Absorbent)

S03B00

Product short description:

Flame-retardant plant absorbent manufactured in compliance with environmental and industrial safety standards. Made from wood particles crushed and dehydrated to over 800 degrees and then fireproofed. Absorbs all liquids, hydrocarbons, oils, greases and by-products. Neither abrasive nor dangerous for man or the environment, VGSORBPLUS does not contain dangerous dust (silica). It is 99% biodegradable and over 97% incineratable. Non-slip, the organic compound absorbent granules do not roll unde...
