

All Hydrophilic Liquids (12 pillows)

S01R40

Product short description:

The sock absorbs all liquids (hydrocarbons, fuels, oils, water, chemicals, etc.). Its great flexibility makes it adaptable to any shape and configuration. Easy to install, it contributes to a clean and safe environment. The handy floor absorbent sock protects sensitive areas before the spread of fluids through the workshop (Example: manholes...) and in case of spillage surrounds a leaking machine to stop and absorb the liquid.
