

Bag holder 240 L

B03D00

Product short description:

Collects, stores, removes or compacts all plastic films and covers. Thanks to its non-return collar, the plastic remains inside and allows the equivalent of 400 to 1000L of flexible plastic to be placed in a 240L bag. Very handy also for plastic strapping, label holders, OIW and any material that does not stay in shape. In one go, you can collect all the bags from the site without bringing or returning a container. The bags will also take up less space in storage.
